

COMPANY PROFILE

PT Investasi Hijau Selaras (HIJAU)

Green Technology Without Worry

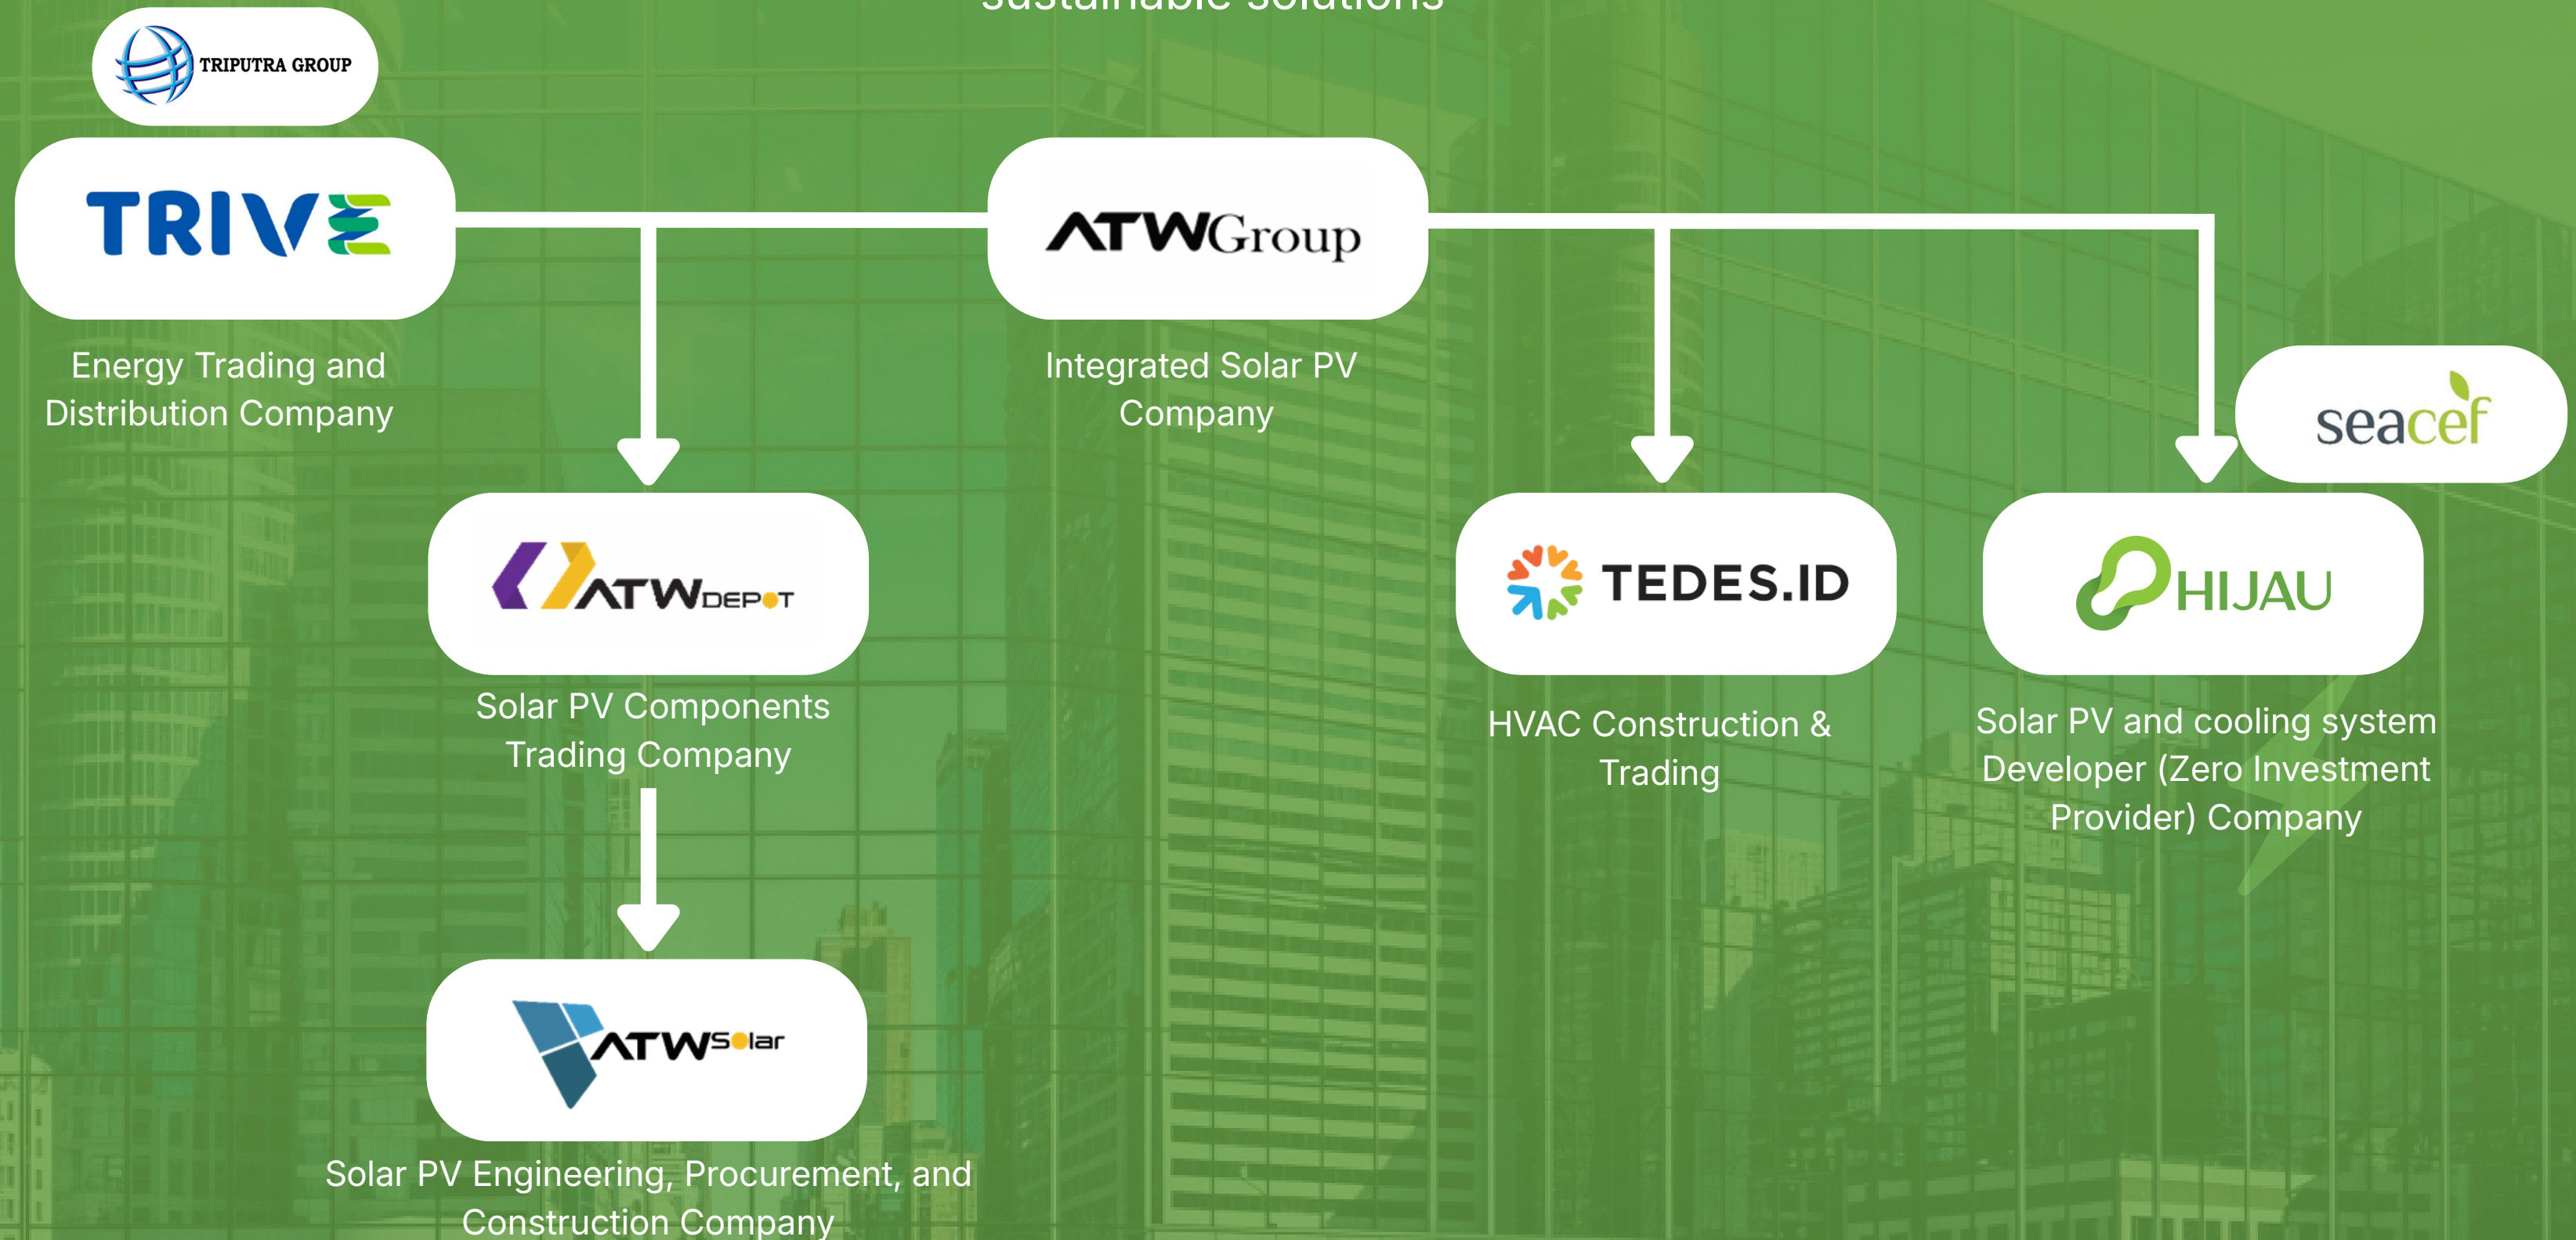

www.hijau.co.id

Group Structure

ATW Group aims to provide an integrated sustainable solutions

Company Milestone

HIJAU envisions bringing clean, dependable, and affordable technology solutions to businesses across Indonesia.

Setting Up (2017)

1. ATW Group officially launched its business.
2. Secured a distributorship for REC*.
3. Formed partnerships with SMK Ma'arif (Djarum Foundation), Politeknik Jember, and Prasetya Mulya University

Partnership (2019-2020)

1. ATW Group entered the EPC market under ATW Solar
2. Market growth surged following regulatory improvements (MoEMR 13/2019)
3. Established a JV partnership with Shizen Energy, a global developer.
4. HIJAU was designated as the local co-developer.

Launched full-fledged operations with a 15 MWp installation under the JV

First Operation (2023)

Company Milestone

Moving forward, HIJAU intend to take part in developing sustainable infrastructure through Cooling-as-a-Service business

- 1. HIJAU secured its initial round of funding from SEACEF II
- 2. The company has 4.3 MWp in operation, 12 MWp in development, and a 185.4 MWp pipeline under its independent management.

Engaged in funding partnerships within the rental business with prominent industry players, Launched Cooling-as-a-Service product.

Achieved 35+ MWp of solar photovoltaic capacity installation, secured debt funding from OCBC and expansion of business lines, including the pilot operation of CaaS

Seed Capital
(2024)

Continue Expanding

Scaling Up
(2025)

HIJAU Provides *Green Technology Without Worry*

HIJAU provides commercial-industrial solar Panel and cooling solutions with priority for

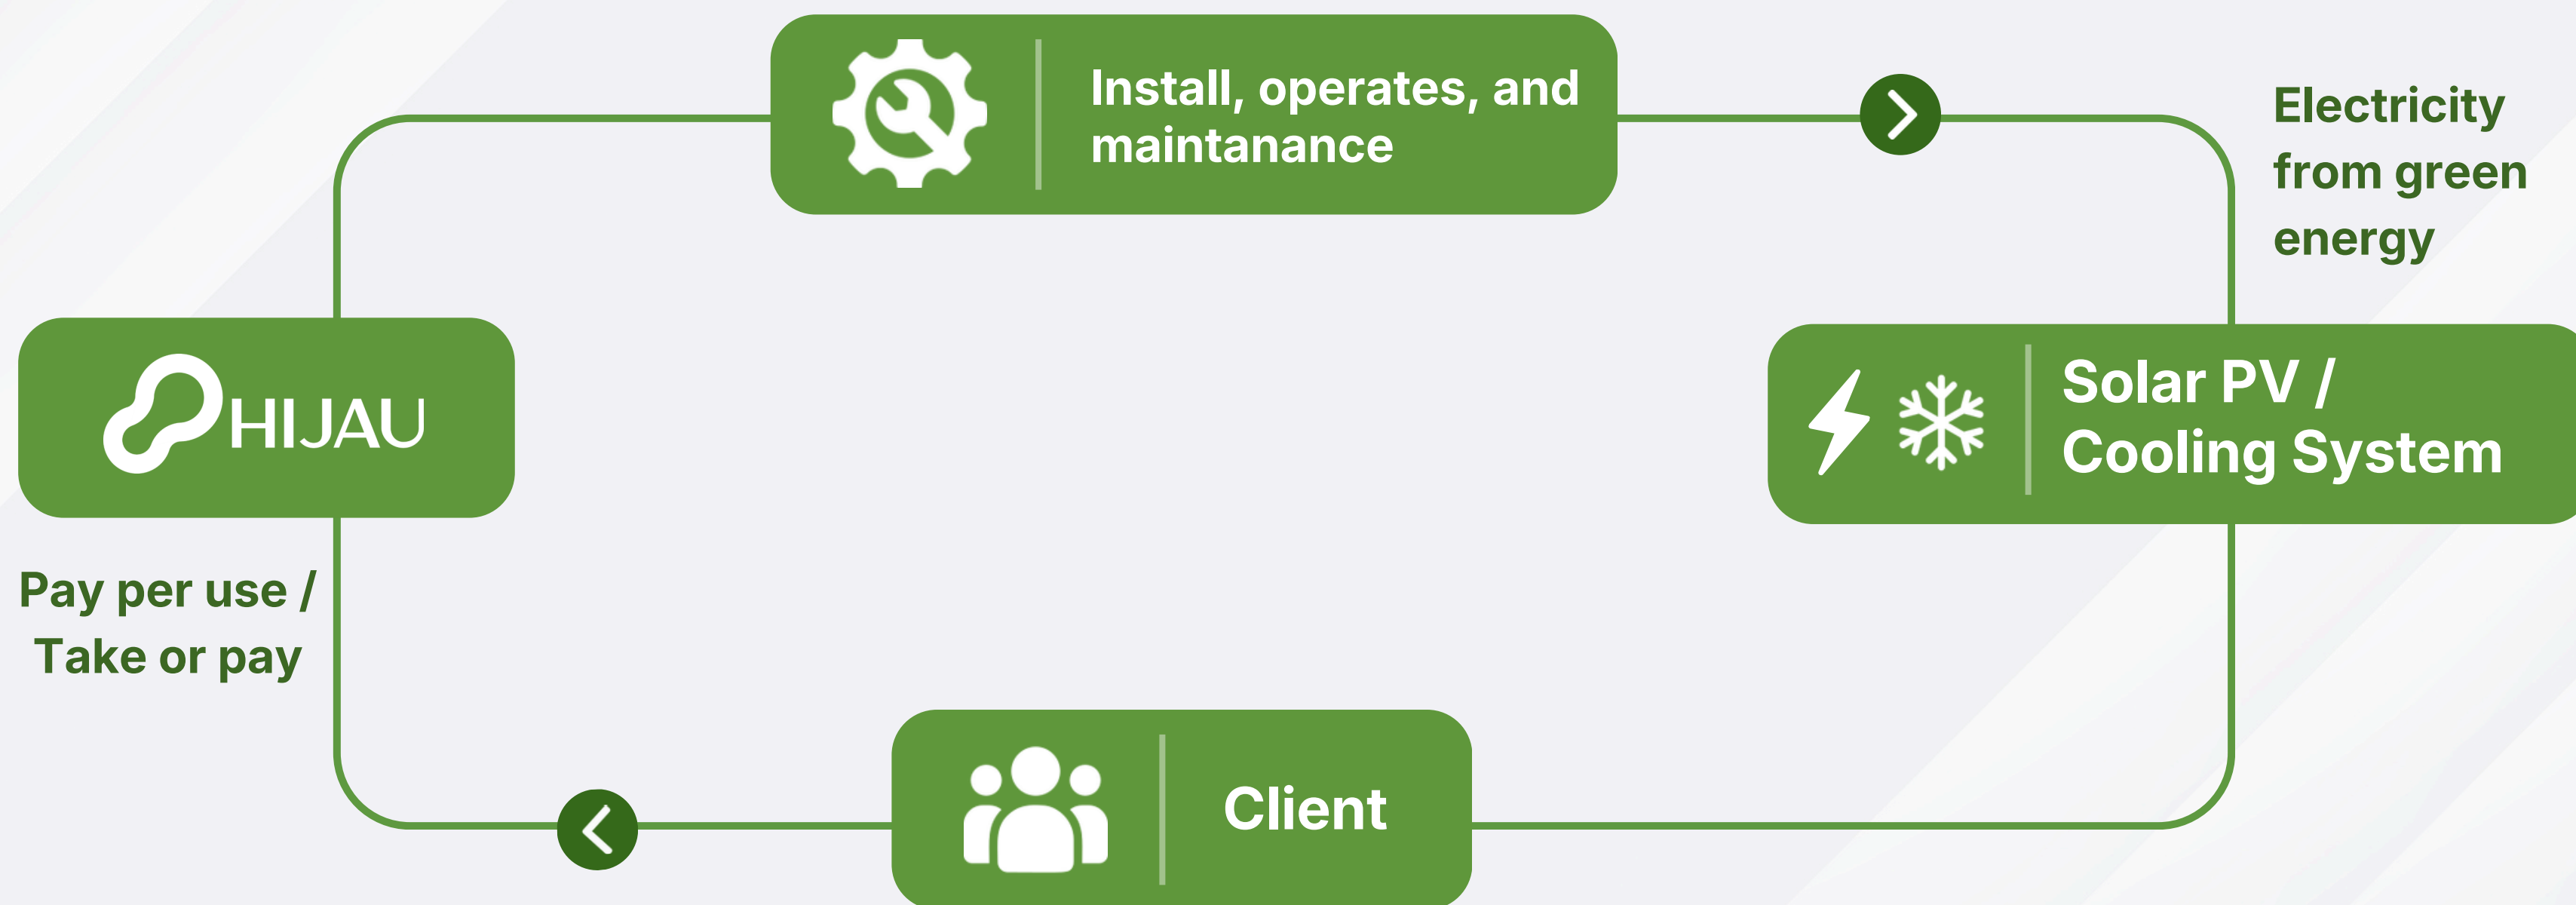

with *zero investment* scheme.

How HIJAU Works :

Complete Solution With Zero Investment

Service Process :

Our Service Process: Efficient and Transparent

01 Preliminary Study & Discussion

We identify your business's energy needs and the best solutions we can provide.

02 Survey & Data Collection

Our team conducts a detailed on-site survey to gather essential data.

03 Proposal Revision After Survey

The proposal is adjusted based on survey results, including system design and estimated savings.

04 Proposal Review & Negotiation

We discuss the proposal thoroughly to ensure everything matches your requirements.

07 Contract Signing

The contract is signed, and your project is ready to enter the installation phase.

06 Administrative Document Collection

We assist in preparing all required administrative documents.

05 Review & Discussion of Lease/Purchase Agreement

We prepare and finalize the contract based on your chosen scheme lease or purchase.

Solar as a Service Case Study

PT CJ Feed & Care
Sector : Livestock Feed

Overview :

Rooftop solar installations across 4 factories in Lampung, Serang, Semarang, and Jombang to reduce carbon emission and achieved savings.

Challenges :

Dusty conditions from livestock machinery emissions required systems designed for durability and consistent performance.

Solutions :

Integrated real-time monitoring systems to ensure optimal performance and minimize the impact of dust accumulation.

Total 3,490 kWp Solar PV

Solar as a Service Case Study

PT HLI Green Power

Sector : EV Battery

Overview :

Solar installations for Korean Global EV Battery Factory with over 7 MWp Solar PV capacity including existing canopy.

Challenges :

Adheres to strict HSE standards and operate machines that are highly sensitive to electrical quality and require uninterrupted power supply.

Solutions :

HSE compliance is strictly monitored throughout the execution and the interconnection process is done under 4 hours.

7,144 kWp Solar PV

Solar as a Service Portfolio

Client List for Zero Investment scheme

No	Project Code	Location	Industry	Size (MWp)	Size (MWAC)	Signing Month

Financial Excellence :

100% Savings After Contract : Maximize Your Energy ROI

We ensure precise and real-time data on energy yield, carbon reduction, and alarms. This monitoring can be accessed from **website and mobile app**

Engineering Excellence :

International Standards, Expertise, and Certifications

With over 35 MWp of photovoltaic installations and engineers **with 10+ years of PV experience**, and backed by **professional certifications**, our team ensures the highest standards in every project.

Design Excellence

Tailored design based on site condition that also make sure that the system is reliable

Structural Integrity Assessment

We ensure our clients' structures are robust enough to support the solar PV system by conducting thorough simulations and evaluations.

Safety Excellence :

Minimizing Risks in Installation & Maintenance

Our system **adheres to HSE and compliance standards to minimize incidents and client asset damage** during both installation and operational maintenance.

Double breaker protection system before interconnecting the PV system to the client's system.

Ensures all PV panels are accessible through a durable, anti-corrosive walkway, eliminating the need to step directly on the roof, which reduces the risk of leakage.

Permanent Horizontal Lifeline Systems are installed along designated walkways and work areas across rooftops with Solar PV systems to control fall risks and ensure safe working at height during inspection, operation, and maintenance activities.

Service Excellence :

Ensuring Protection for All Stakeholders

We prioritize the security and satisfaction of all stakeholders by ensuring these points :

Performance Guarantee

We stand by the performance of our solar PV systems, guaranteeing their reliability. If our systems fall short of the promised performance, we take full responsibility, even compensating our clients if necessary.

Insurance

We are safeguarding all of our solar PV assets with an all-risk insurance, ensuring reliability and peace of mind for all stakeholders.

Government Compliance

Our system is designed to ensuring compliance at every stage. By strictly following these regulations, we minimize risks, protect all stakeholder assets, and maintain operational reliability.

Antonius Weno | **Founder/President Commissioner**

More than 25 years experience in business operations, financial management, and risk management across various industries, including banking and real sectors. Held positions as President Commissioner of PT Buana Finance Tbk, VP Business Development of Mizuho Bank, Director of Astra Sedaya Finance, Director of Atlas Resources, and CEO of Yarra Group.

Universitas Wijayakusuma, BSc in Economics

John Colombo | **Country Manager, Clime Capital Management**

More than 14 years of professional experience in the fields of renewable energy and mobility sectors. Held positions as Country Director for Asia Power Development Platform (APDP) and Head of Public Policy and Government Affairs for Uber.

University of Minnesota, BSc in Economics

Victor Samuel | **President Director**

More than 10 years experience in business development and sales leadership in the solar PV industry, securing major deals and leading operations across various markets. Demonstrated success in securing significant deals, driving technical and commercial negotiations, and leading strategic partnerships with global companies. Held positions as Country Director for Indonesia and Vietnam, REC Singapore

KTH Stockholm, TU Eindhoven, MSc in Sustainable Energy; ITB, BSc in Engineering Physics

Thio Ariyanto | **Operational Director**

More than 8 years experience in solar sales, engineering, and project management. Proven experience in leading large-scale projects, feasibility studies, and asset management. Held position as senior sales and project manager in Syntek Solar.

TU Delft, MSc in Sustainable Energy; ITB, BSc in Engineering Physics
